-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## **DETAILED ACTION**

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the telephone communication service provider of claim 5, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by

***Wiedeman (Patent Publication US 2002/0032002 A1).***

Regarding claim 1, In paragraph [0021], Wiedeman teaches that when a user terminal **10** becomes impaired by loss of path diversity, a warning is delivered to the user via some indicator which may be audible, which reads on “a mobile telephone device with means for audio indication of call status.”

Regarding claim 2, in the last sentence of paragraph [0021], Wiedeman teaches that the audible indicator may be used to annunciate a message to the user, thereby reading on “said audio indication is a pre-recorded audio message stored in said mobile telephone device.”

Regarding claim 3, in paragraph [0022], Wiedeman teaches that the indicator may be used to warn the user of an increased potential to experience a dropped call, which reads on “said audio indication plays a pre-recorded audio based on call status, whereby said audio indication is triggered by call termination.”

Regarding claim 4, in the last five lines of paragraph [0025], and in the last six lines of paragraph [0028], Wiedeman teaches that the user terminal **10** is able to determine an increased potential for a dropped call based upon a variety of factors, in which case, a message from the controller will activate the indicator, the message from the controller **18**, is interpreted as reading on "a trigger signal" for causing the audio indication to be played, as claimed.

Regarding claim 5, in paragraph [0023], Wiedeman teaches a technique in which information from the communications ground station (GW) **50** is used to deliver a warning indicator to the user terminal **10**, **also see paragraph [0031]**, said information is interpreted as the "trigger signal", thereby reading on "wherein said trigger signal is received from a mobile telecommunications service provider."

Regarding claim 6, In the last sentence of paragraph [0022], Wiedeman teaches that undesirable signal strength or signal quality conditions can cause activation of a warning indicator; said undesirable signal strength or signal quality conditions are interpreted as "bad conditions" and thereby reads on "means for generating a 'bad connection' signal within said mobile telephone device."
